User Manual - Twint-like System

Connection Process

1. Launch the Client Application:

Open PowerShell.
Navigate to the directory where Client.jar is stored.

2. Start the Client:

Run the following command:

java -jar Client.jar

Upon launching, you will receive a prompt from the server:

```
Connected to the server.
Server: Welcome !
Server: Create an account : 1
Server: Connect : 2
Server: Return : 3
Server: exit
```

3. Create an Account: Enter 1 to create a new account and follow the instructions.

4. Log In: Enter 2 if you already have an account and wish to connect.

Using Your Account

Once connected, you can use the following commands to manage your account and interact with the server:

Deposit Funds:
    Command: deposit <amount>
    Description: Deposits the specified <amount> into your account.

Transfer Funds:
    Command: transfer <amount> <toClientId>
    Description: Transfers the specified <amount> to another account identified by <toClientId>.

Check Balance:
    Command: balance
    Description: Displays your current account balance.

View Transactions:
    Command: transaction
    Description: Shows a list of all your recent transactions.

Help:
    Command: help
    Description: Displays all available commands and how to use them.

Exit:
    Command: exit
    Description: Disconnects you from the server safely.
